

# 任意の文字を改訂バーとして出力

Antenna House Formatter では、fo:change-bar-begin の子要素に fo:float を記述できるように拡張されています。これにより任意の文字を改訂バーとして出力することができます。

```
<fo:change-bar-begin change-bar-class="abc">  
<fo:float float="start">  
<fo:block-container width="2em" background-  
color="lightpink">  
<fo:block font-size="0.8em">※改</fo:block>  
</fo:block-container>  
</fo:float>  
</fo:change-bar-begin>
```

※改
